

BAMBOOWALL® Garden Screen

Tropical, distinctive, and fully customisable!

KOKOSYSTEMS BV
INNOVATIVE BARRIER SYSTEMS

Give your garden a tropical feel with *BambooWall®* Garden Screens! The stunning combination of bamboo and galvanised steel gives every garden a warm and distinctive appearance.

Bamboo is an extremely strong and sustainable plant species, perfect for exterior applications. Bamboo is also a renewable resource, it absorbs CO₂, and reduces particulates during growth.

BambooWall® Garden Screen panels consist of a frame made of galvanised steel channels filled with a **single row of bamboo**. The bamboo is somewhat arranged in the frame, making the screens virtually sight proof.

The screens can be easily mounted between wooden, concrete, or special galvanised steel H-posts. As a whole, it forms a very robust, attractive, and virtually maintenance-free garden screen unlike any other!

The *BambooWall®* Garden Screen is a Dutch invention and is manufactured entirely in the Netherlands.

BAMBOOWALL® Garden Screen

Tropical, distinctive, and fully customisable!

Applications

BambooWall® Garden Screens can be mounted as desired, between galvanised steel, wooden, or concrete posts.

Kokosystems also supplies **matching doors** with a cylinder lock or thumb latch.

Additional options: panels fitted with a galvanised mesh behind the bamboo (for growing climbing plants).

Anti-climb spikes installed along the top.

BambooWall® Garden Screens can be nicely combined horizontally and vertically with mesh panels which come in the same steel frame as the **BambooWall®** Garden Screen

Measurements

Standard BambooWall® Garden Screen	W x H	180 x 90 cm
Wide BambooWall® Garden Screen	W x H	200 x 90 cm
Extra wide BambooWall® Garden Screen	W x H	249 x 90 cm
Narrow BambooWall® Garden Screen	W x H	90 x 90 cm
High BambooWall® Garden Screen	W x H	180 x 100 cm
Wide BambooWall® Garden Screen	W x H	200 x 100 cm
Extra wide BambooWall® Garden Screen	W x H	249 x 100 cm
Narrow and high BambooWall® Screen	W x H	90 x 100 cm

BambooWall® Garden Screens can be supplied in **any other desired measurement** (maximum width being 249 cm and height 125 cm). Panels are stacked to reach heights above 125 cm. If necessary, the screens can easily be made to size during installation. A standard **BambooWall®** Garden Screen weighs approximately 25 kg and is 4 cm thick.

Mounting between steel posts

JB metallic or IPE type steel H-post. Screens are mounted using four \varnothing 4.8 x 25 mm self-tapping screws per screen.

Mounting between wooden posts

6.5 x 6.5 cm or 8.5 x 8.5 cm wooden post. Screens are mounted using four stainless steel mounting brackets and eight \varnothing 4.8 x 25 mm self-tapping screws per screen.

Eco Friendly and Sustainable

Bamboo is an extremely fast-growing plant species. If the roots are left intact, Bamboo will grow back very quickly after harvesting. The bamboo we use is therefore a renewable resource. Bamboo also has the same properties as tropical hardwood and does not decay. This ensures that the screens will last a very long time.

Maintenance

Over time, due to various weather influences, the bamboo will become slightly duller and lighter in colour, and may also split vertically. The screens will, however, retain their natural look. If desired, you can treat the screens with a clear coat to further protect the bamboo and restore the original colour and lustre.
